Nguyen Ba Khuong

Front-End Developer

0862048927 khuongba0907@gmail.com 09/07/2004 Cau Giay District, Hanoi, Vietnam

PROFESSIONAL OBJECTIVE

Front-End Developer with 2 years of professional experience contributing to real-world projects in collaborative environments. Experienced in participating in the full development lifecycle, from requirement analysis to deployment and production optimization.
I am seeking a professional and growth-oriented environment where I can continue gaining practical experience, take on greater responsibilities, and contribute consistently to long-term product development while advancing toward a mid-level engineering role.

EDUCATION

Hanoi University of Industry 2022 - Present

Major: Software Engineering

GPA:3.2/4.0

SKILLS

FRONTEND: HTML, CSS/SCSS, Javascript/Typescript, Tailwind, ReactJS, VueJS, NuxtJS

BACKEND: .NET, ASP.NET

DATABASE: SQL Server, MySQL

DEPLOY: VPS, Docker

AI SUPPORT: MCP Server, Github Copilot, Claude CLI

TECHNOLOGIES: Socket.IO, Git, Ant Design Vue, GSAP, AOS, n8n

RELEVANT SKILLS

• Experience working with RESTful APIs and modern architectural patterns such as MVC and MVVM.
• Proficient in Git and experienced in collaborating within team-based development environments.
• Strong understanding of UI/UX principles with a focus on responsive and user-friendly interfaces.
• Experienced in state management using Vuex and Pinia.
• Capable of implementing interactive animations using GSAP and AOS.
• Able to read and understand technical documentation in English.
• Highly responsible, self-motivated, and quick to learn new technologies.

WORK EXPERIENCE

NOVAON DIGITAL 04/2024 - 07/2024

Designer, Web developer

- Designed and developed static websites for events, restaurants, and service landing pages.
- Ensured user-friendly interfaces and cross-device compatibility.
- Utilized **HTML5, CSS3, JavaScript**, and **Figma**.
- Collaborated with the marketing team to optimize performance and user experience.

NEKSOLUTION 08/2024 - Present

Frontend Developer

3D Viewer — Front-End Developer

- Built a 3D web application using Nuxt 2, Tailwind CSS, Ant Design Vue, and Three.js.
- Implemented JWT & Google OAuth authentication with role-based access control.
- Rendered and optimized interactive GLB models with performance-focused state management (Vuex).
- Deployed to VPS and optimized production performance.

CMS Streamie — Front-End Developer

- Developed CMS using Nuxt 3, TypeScript, Tailwind CSS, Ant Design Vue.
- Managed state with Pinia; built reusable, scalable components.
- Integrated Spine Web Player for 2D animation management.
- Configured VPS deployment and production optimization

Landing Page (Streamie, NekSolution) — Front-End Developer

- Developed SEO-optimized landing pages with Vue 3 and Tailwind CSS.
- Implemented animations using GSAP and AOS for enhanced UX.
- Integrated Web3 features using Ethers.js (wallet connection, smart contract interaction, presale features).
- Ensured responsive design, clean architecture, and production-ready deployment.

Core Tools & Technologies

- Vue 3, Nuxt 2/3, TypeScript, Tailwind CSS, Ant Design Vue, Three.js, Vuex, Pinia, GSAP, AOS, Ethers.js (Web3), Git, Figma, MCP architecture, VPS deployment, SEO optimization.

PROJECT

Haui-Learning – Online Learning Website 11/2024 - 03/2025

Team size: 4 | Role: Frontend Developer

- Developed a **Single Page Application (SPA)** for online courses: browsing, registration, purchasing, and learning.
- Built the entire frontend using **ReactJS** with a responsive, modern interface.
- Implemented features: authentication, admin management, course search/filter, course details, and simulated payments.
- Tech stack: **ReactJS, Redux, Axios, Material-UI | Spring Boot | MySQL**
- Outcome: Mastered SPA development workflow, reusable component design, and state management.

- BE: https://github.com/HaUI-Elearning/haui-elearning-api

HIT Learning – Internal Class Management Website 06/2024 - 10/2024

Team size: 4 | Role: Frontend Developer

- Built an internal platform for **HIT Club (Hanoi University of Industry)** to manage and share video lectures.
- Contributed to frontend development: UI implementation, video categorization, and display logic.
- Implemented features: video browsing by class, search function, responsive design, and in-browser video playback.
- Tech stack: **ReactJS, Redux, Axios, Material-UI | Spring Boot | MySQL**
- Outcome: Improved teamwork, Git/GitHub proficiency, and optimized frontend performance.
